

# PHASE 5 – PROJECT DEVELOPMENT

*Project: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer*

## 1. Development Objective

The development phase implements the automated Standard Laptop procurement workflow in ServiceNow. The documented implementation consists of creating a Flow in Flow Designer, assigning it to the Standard Laptop service catalog item, and using the Service Catalog to place and approve a request.

## 2. Milestone 1 – Flow Creation

- Open ServiceNow.
- Click All and search for Flow Designer.
- Open Flow Designer under Process Automation.
- Click New and select Flow.
- Set the Flow Name as “Standard Laptop Task”.
- Set Application as Global.
- Set Run as to “System User”.
- Click Submit.
- Click Add a trigger.
- Search for and select “Service Catalog” as the trigger.
- Click Done.
- Under Actions, click Add an action.
- Search for and select “Create Catalog Task”.
- Set the action as Create Catalog Task.
- Drag and drop the Requested Item Record into Request item.
- Verify that the table is populated as a Catalog Task.
- Set the short description as “Laptop need to Configured”.
- Add the Description field with the value “Laptop need to Configured”.
- Set Assignment group to “Hardware”.

- Set Approval to “Approved”.
- Leave the remaining fields as default and click Done.
- Save the Flow.
- Click Activate and activate the Flow.

### **3. Milestone 2 – Flow Assignment**

- Open ServiceNow.
- Click All and search for Maintain Items.
- Open Maintain Items.
- Under the Name field, search for StandardLaptop and select the record.
- Open the Process engine section.
- Remove the remaining automations and add Flow.
- Add the Flow named “Standard Laptop Task”.
- Use the menu to save the record.

### **4. Milestone 3 – Service Catalog**

- Click All and search for Service Catalog.
- Open Service Catalog and select Hardware.
- Find and select Standard Laptop.
- Click Order Now to place the request.
- View the Order status.
- Click the Request Number to open the Requested record.
- Scroll to the Approvers section.
- Open the Requested Item section.
- Open the Requested Item record.
- Use the record configuration to select Approve.
- Scroll to the Catalog Tasks section.
- Open the Catalog Task record to view its status, short description, and assigned group.

### **5. Development Configuration Summary**

| Configuration     | Value                     |
|-------------------|---------------------------|
| Flow Name         | Standard Laptop Task      |
| Application       | Global                    |
| Run As            | System User               |
| Trigger           | Service Catalog           |
| Action            | Create Catalog Task       |
| Request Item      | Requested Item Record     |
| Short Description | Laptop need to Configured |
| Description       | Laptop need to Configured |
| Assignment Group  | Hardware                  |
| Approval          | Approved                  |

## 6. Conclusion

The development phase implements the planned automation in ServiceNow. The Flow creates a Catalog Task for the approved Standard Laptop request and assigns the task to the Hardware group for configuration.
