

PHASE 8 – PROJECT DEMONSTRATION

Project: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

1. Demonstration Objective

The demonstration phase presents the completed Standard Laptop procurement automation in ServiceNow. The demonstration should show the request process, approval, automated task creation, and assignment to the Hardware group.

2. Demonstration Flow

- Open ServiceNow.
- Open Service Catalog.
- Select Hardware.
- Select Standard Laptop.
- Click Order Now.
- Show the Order status.
- Open the Request Number.
- Show the Approvers section.
- Open the Requested Item.
- Approve the request.
- Scroll to the Catalog Tasks section.
- Open the created Catalog Task.
- Show the updated task status.
- Show the short description.
- Show the assigned group as Hardware.

3. Suggested Demo Narration

“This project is titled Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer. The purpose of the project is to

streamline the process of ordering standard laptops and automatically generate a configuration task for the Hardware team after approval.

First, I open the Service Catalog and select Hardware. Then I select Standard Laptop and click Order Now to place the request. I open the Request Number and view the approval and Requested Item details. After approving the request, I navigate to the Catalog Tasks section. Here, the generated task can be opened and its status, short description, and Hardware assignment can be verified.

This demonstrates how the Flow Designer automation connects the approved Standard Laptop request to the configuration task for the Hardware team.”

4. Key Features to Highlight

- Service Catalog based Standard Laptop request.
- Approval-based workflow.
- Flow Designer automation.
- Automatic creation of a Catalog Task.
- Automatic assignment to the Hardware group.
- Laptop configuration task details available for verification.

5. Project Benefits to Mention

- Reduces manual intervention in the procurement process.
- Helps ensure timely laptop configuration.
- Reduces user waiting time.
- Improves resource and task allocation.
- Enhances efficiency and productivity in IT procurement operations.

6. Demo Evidence

The final submission can include screenshots or a complete screen-recorded demonstration showing the Service Catalog request, approval, Requested Item, and resulting Catalog Task.

7. Conclusion

The demonstration shows the complete automated workflow for a Standard Laptop request, from placing the request through approval to the creation and assignment of the configuration task.
